

COMMERCIAL PROPOSAL

Trade Mission to Poland

Organisation of a trade mission & general cooperation

OFFERING PARTY	Elzbieta Juszczak Paderewskiego 56, 05-520 Konstancin-Jeziorna, Poland VAT: PL 5860062977 md@poland-importers.com · +48 601 080 490
PREPARED FOR	Mr Yahia El Menshawy, MBA Business Development & International Cooperation Manager Chemical & Fertilizers Export Council Ministry of Investment and Foreign Trade
SUBJECT	Trade mission to Poland and general cooperation
COUNTRY OF PERFORMANCE	Poland

I The Mechanism and Requirements for Organizing a Trade Mission

■ Organization Stages

- 1) Selection of the group of products for the trade mission.
- 2) Selection of the city and time range.
- 3) Deciding the duration of the trade mission.
- 4) Preparing a draft programme of the trade mission and the logo.
- 5) Preparing a plan for the recruitment of buyers.
- 6) Preparing the plan for promoting the event, including drafts of promotional materials.
- 7) **Substantive preparation (pre-mission)** — collecting profiles of potential visitors (company profile, value proposition, HS codes, partner preferences) and screening of profiles.
- 8) **Execution (in-market)** — preparing a plan of briefings with the embassy/consulate, one-on-one meetings with pre-selected partners, site visits, and events with local chambers and associations. Having officials present often raises the profile of the event.
- 9) **Follow-up and evaluation** — meeting summaries, sending materials, invitations for second meetings (including additional decision-makers), and tracking metrics (number of leads, qualified contacts, pipeline, deals, and qualitative feedback).

■ Methodology for Identifying and Arranging B2B Meetings

1. Define objectives and participant profiles

- Establish the trade mission's objectives, target sectors, and priority products or services.
- Collect detailed profiles of participating companies, including their offerings, production capacity, and import preferences.
- Determine each participant's ideal business-partner profile (e.g., importer, distributor, wholesaler, agent, or direct buyer).

2. Market research and partner identification

- Conduct comprehensive market research to identify potential buyers and distribution partners that match the participants' objectives.
- Utilise multiple sources, including those listed below.
 - Industry databases and business directories
 - Chambers of commerce and trade associations
 - Government trade and investment agencies
 - Sector-specific exhibitions and trade-fair databases
 - Existing business networks and referrals
 - Professional networking platforms and commercial intelligence tools
 - The firm's own records

II Expected Scope of Services, Timeline, and Deliverables

■ Timeline

Once the decision to hold the trade mission has been taken, the following deadlines and core dates shall be agreed:

- 1) Deadline to agree the date range for the trade event (assumed to be a two-day event).
- 2) Deadline to collect offers of available and suggested venues for the trade event.
- 3) Deadline to decide the final dates and venue.
- 4) A period of three months is required to arrange the event to the highest professional standard.
- 5) The Consultant's progress shall be reported as set out below.
 - Until four weeks before the event — once a week
 - Until one week before the event — twice a week
 - During the last week before the event — every day

■ Scope of Work and Standards

In close collaboration with the Ministry, the firm will undertake the following tasks for each trade event:

- **Business Lead Identification.** Conduct thorough analysis to pinpoint qualified business leads within the target market. Use targeted marketing campaigns and digital advertising strategies to attract potential leads; engage in networking events, trade shows, and industry conferences to establish direct connections with key decision-makers; and implement scoring systems to prioritise high-potential prospects against predefined criteria such as company size, industry relevance, and purchasing power. Collaborate with counterparts in the target markets, associations, and chambers of commerce to gain insights and access to exclusive business directories.
- **Capability Assessment for Egyptian Companies.** Collaborate with the Ministry's teams to review the product portfolios of the selected companies. This includes a thorough analysis of their export potential and pinpointing areas for improvement to better align with the preferences and regulations of the local Polish market, helping to tailor the products to meet market demands.
- **Buyer List Preparation.** Compile a list of prospective buyers — importers, agents, wholesalers, and direct buyers — and, where possible, their company profiles, ensuring the list is up-to-date and relevant to the target markets.
- **Orientation Session.** Conduct an orientation session for interested parties (the Ministry's team and participants) to familiarise them with the target market, including consumer preferences, specifications, certifications, required documents, and market demands.
- **Venue Proposal.** Suggest an appropriate venue and time for holding the trade event, considering accessibility and facilities, and ensuring the venue can accommodate the expected number of participants. Coordinate with the Ministry's team to finalise the venue setup. A reference offer of showrooms / hotel rooms is attached.
- **B2B Meeting Arrangement.** Schedule high-quality B2B meetings between Egyptian companies and their counterparts in the Polish market.
- **B2B Meeting Management.** Oversee the organisation, confirmation, and management of B2B meetings, including buyer invitations, coordination, and handling, and facilitate the meetings to ensure productive interactions.
- **Supporting Activities.** Carry out additional activities that may ensure the trade event's success, including but not limited to digital marketing, e-commerce activities, orientations, preparatory missions, and the creation of a dedicated website for the trade event.
- **Registration Management Assistance.** Help the client manage registrations, including handling buyers' registration, scheduling walk-in buyers based on availability, sending reminders to registered buyers, and updating the master schedule.

- **Comprehensive Report Preparation.** Draft a detailed report for the trade event covering the mission's objectives, activities, outcomes, and recommendations for future actions, together with an overview of the event, key participants, significant trends, identified opportunities, and suggestions for future participation and follow-up.
- **Buyer Feedback.** After the trade mission, collect and document feedback from the buyers who attended the event, as fully as possible.

■ Deliverables

- An initial list of invited participants and their specialisation, to be submitted approximately three to four weeks before the trade mission.
- In collaboration with the Ministry, a verified list of eligible Egyptian companies to participate in the trade event, based on a thorough analysis of each company's capabilities and products.
- A presentation for the orientation session covering consumer preferences, product specifications, certifications, required documents, and market demands.
- A list of suggested venues for the export-promotion event that will ensure optimal implementation of the activity, including the specifications of the required venue.
- A list of key associations that might support the trade event and could be invited.
- A detailed list of confirmed buyers attending the trade event and a schedule of meetings, to be shared with the Ministry one week before the event.
- A follow-up matrix of the buyers who attended, including their feedback, the probability of doing business with Egyptian companies, and any positive or negative aspects of dealing with Egyptian exporters in general, for the Ministry's learning purposes.

III

Estimated Costs and Commercial Terms

■ Costs

Estimated cost of preparing the trade mission (excluding showroom costs), based on 10–20 participants and 30–40 visitors:

Number of working days (all project stages)	60 days
Fee per day	EUR 400
Total fee	EUR 24,000

This covers all preparation of the trade mission, excluding the costs of the showroom, hotel rooms, catering, and transfers. A detailed schedule of the working process and days can be presented for a specific project.

■ Cost of Showrooms

Costs are variable and depend on the booking time, hotel policies, and season. The following are examples of current costs.

Venue	Space	Space cost	Catering
Centre of Warsaw			
Hotel Novotel Centrum	200 m ²	EUR 1,500/day	EUR 1,250/day

Hotel NYX by Leonardo	300 m ²	EUR 3,900/day	EUR 1,200/day
Airport area (outside the centre)			
Marriott	216 m ²	EUR 2,800/day	EUR 1,000/day

All showroom estimates assume 10–12 exhibitors and 40 visitors.

■ Cost of Hotel Rooms

- Single room: EUR 130–150 per day.
- Double room: EUR 140–160 per day.

■ Commercial Terms

- Showroom and catering are paid by the Council directly; payment terms are usually 50% in advance and 50% after the event.
- Hotel rooms are paid individually by exhibitors; we always request special rates for participants.
- Terms of payment for arranging the trade mission: 30% on signing the contract, 30% before the event, and 40% after the event. These terms are negotiable.

V Market Requirements for Selected Products

We enclose the market requirements for selected products. EU regulatory acts can be shared once a project is planned for a selected and specified group of products. Each product group has its own regulations and requirements of a legal and official nature, and market requirements may constitute an additional layer.

Product	Import requirements & regulations
Raw Materials, Plastics and Recyclates	
Raw PVC, PET, PP	REACH, SDS, CoA (absence of SVHC).
Recycled plastic, paper, rubber, gas	End-of-Waste Certificate / permit for international waste shipment; DoC and EFSA for food-grade.
Packaging	
Plastic packaging for food	DoC for Food Contact Materials; overall and specific migration test reports; GMP certificate or proof of compliance.

Product	Import requirements & regulations
Glass bottles, jars, containers	DoC; lab test report for lead and cadmium release; certificate of compliance with heavy-metal limits in packaging (sum of lead, cadmium, mercury, and hexavalent chromium below 100 ppm).
Paper packaging	EUDR Due Diligence Statement; DoC for food contact (if applicable); lab test reports (e.g., for heavy metals, formaldehyde, PCP), depending on intended use.
Industrial, Agricultural and Biocidal Chemicals	
Fertilizers	EU Declaration of Conformity (CE); EU Type-Examination Certificate; SDS.
Insecticides, rodenticides, fungicides	SDS; approved product label; MRiRW permit (Polish agricultural); Biocidal Product Authorization (Polish home / industrial).
Disinfectants, anti-corrosion agents	Biocidal Product Authorization from URPL; SDS with CLP classification; proof of Poison Centre Notification (PCN).
Paints and varnishes	SDS; VOC; PCN.
Industrial salts / inorganic salts and halides	SDS; for precursor salts, an End-User Declaration and the importer's registration in the relevant national tracking system.
Specialized Products	
Medical and laboratory plasticware	MDR: CE, ISO 13485, notification to the Polish URPL, registration in EUDAMED. IVDR: CE (IVDR), notified-body certificates. General equipment: General Product Safety declaration / technical documentation.
Tires and inner tubes	E-mark (Type Approval Certificate); EU Tyre Label generated from EPREL; laboratory test report for PAHs (REACH requirement).
